

TENAQUIP

INDUSTRIAL EQUIPMENT, SUPPLIES & SOLUTIONS

Basic Fall Protection Training | Duration: 8 hours

Maximum Participants: 12 students | Product Code: SHC107

COURSE TOPICS:

- Regulations and standards
- Fundamental principles of fall protection
- Active and passive fall protection
- Hierarchy of fall protection
- Fall protection systems and components
- Anchorage, connecting components, and harnesses
- Portable ladders
- Continuous protection
- Equipment maintenance and inspection

COURSE DESCRIPTION:

Our Basic Fall Protection Training provides students with the knowledge and understanding to identify the hazards that they will encounter when working at heights in various capacities. Additionally, it includes measures for reducing or eliminating those hazards through selection of the correct systems and equipment. We help students to understand the regulations and standards that govern work at heights, and the importance of why they should be followed by workers and supervisors alike.

This course is ideal for various types of maintenance and construction personnel and their supervisors. It provides a clear understanding of the equipment and safety systems that they will use in order to ensure a safe working environment.
